TEAM SELLM · TACTO NEGOTIATION ARENA

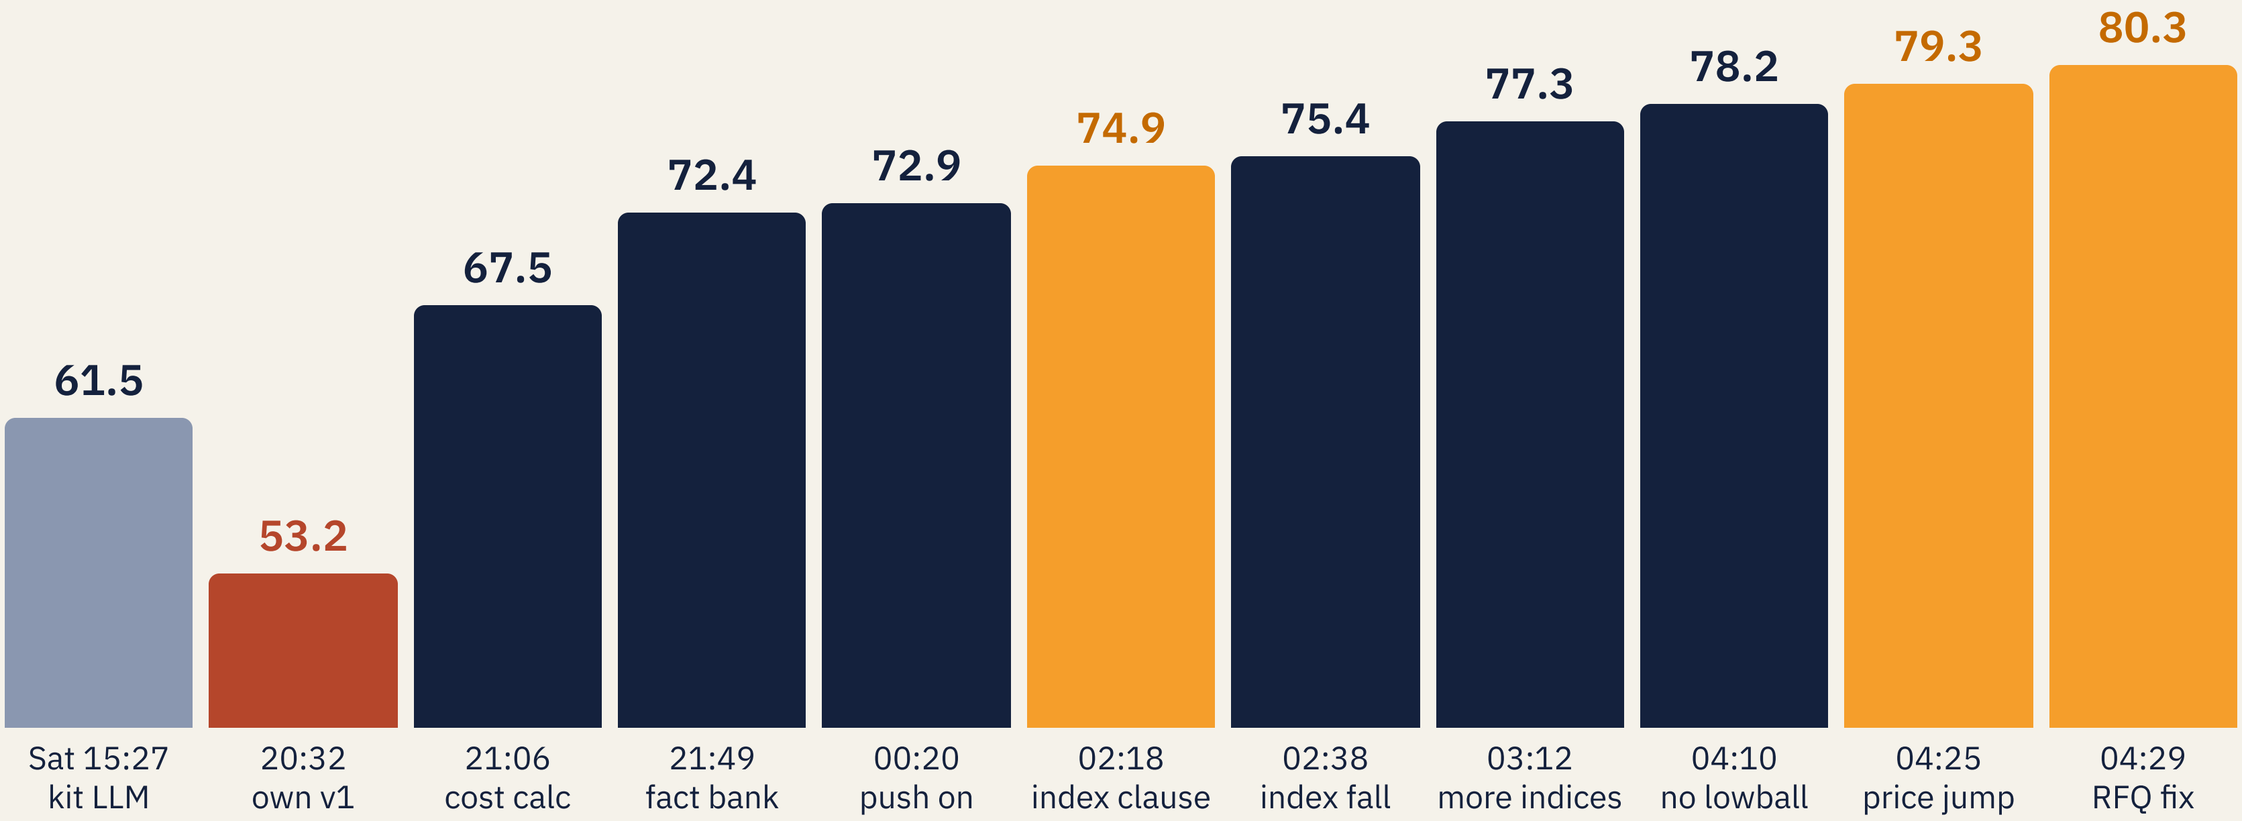

A buyer that measures before it negotiates

61.5 → 80.3

mean score, 10 practice cases
kit agent → our agent

17 hours, 11 measured versions

mean score × 100, all 10 practice cases

Orange = moves no kit agent makes · red = our first own agent lost 8 points: structure before price was the lesson · 80.3 confirmed with the Sunday data (08:08)

WHAT OTHERS DON'T DO

Measured, not guessed

Our own supplier simulator

0.72 %

error per real supplier reply - thousands of free test runs

Offline replay proof

451

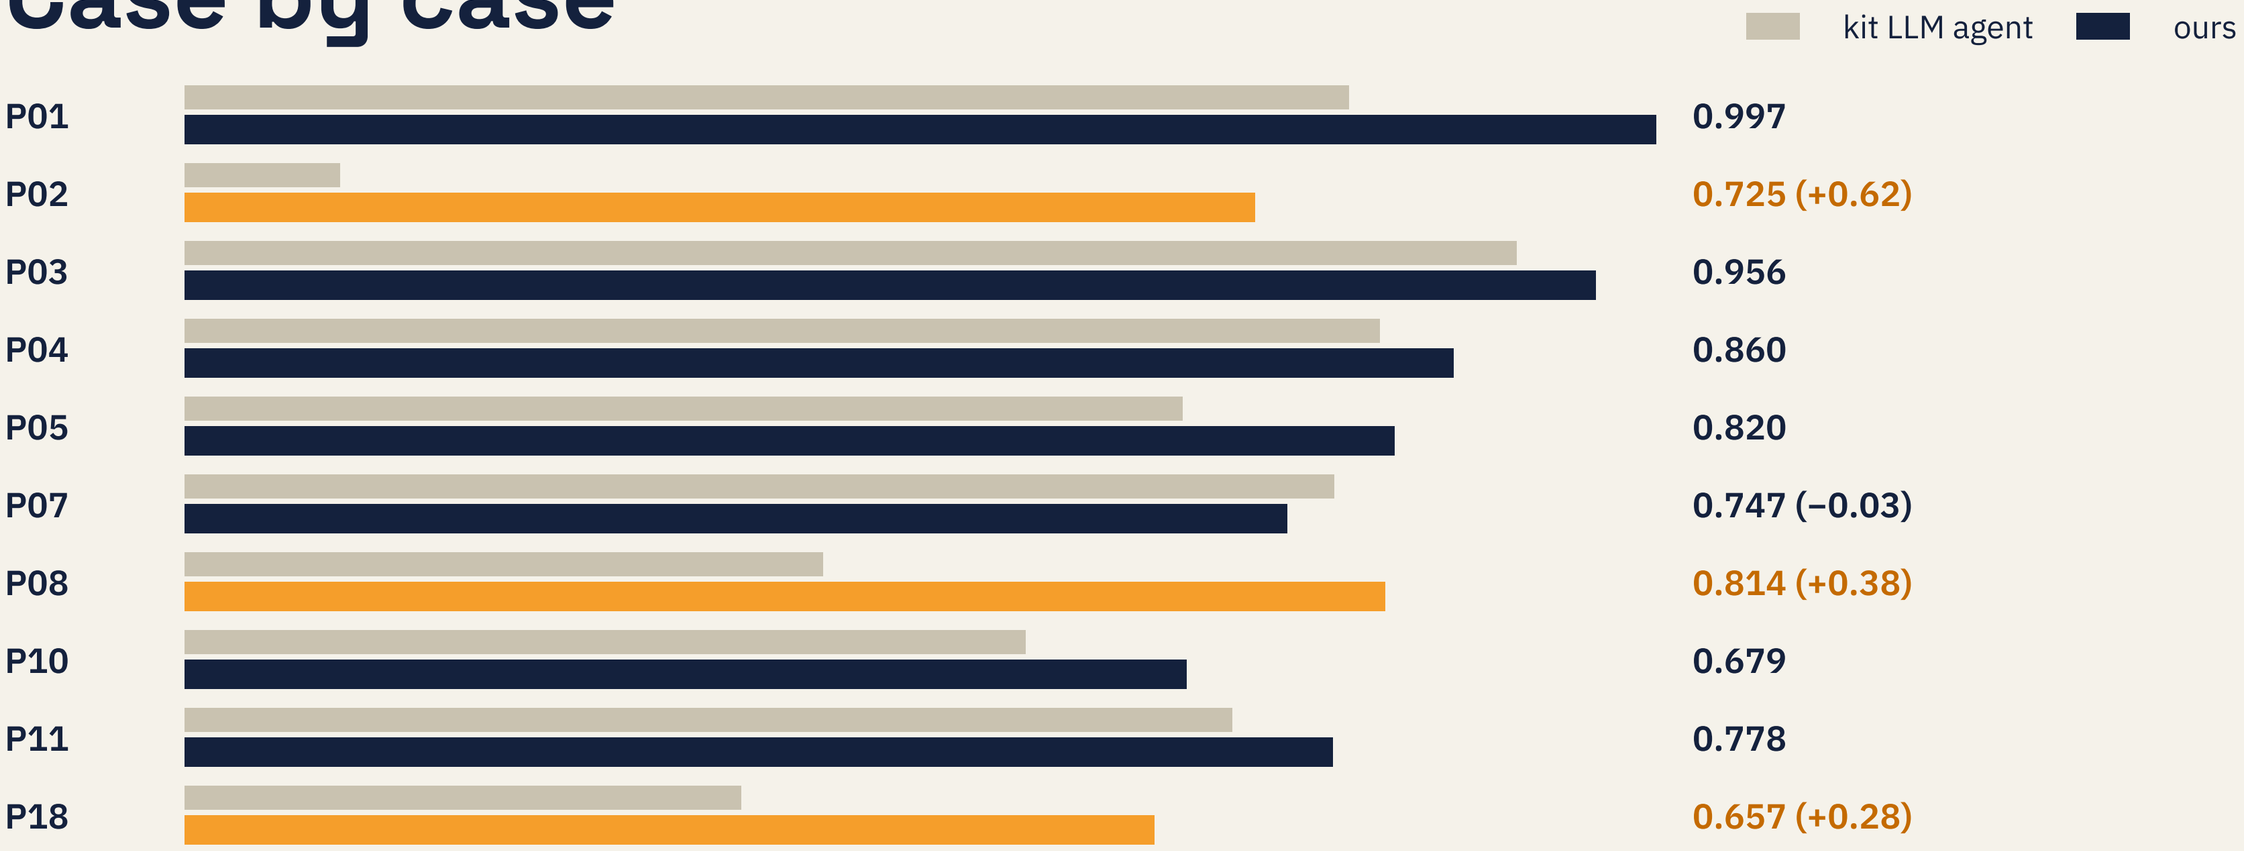

sessions saved: same e-mail, same answer - one session per idea

Code decides, LLM reads

71.6

with LLM-written e-mails vs 72.9 with ours - so code writes the numbers

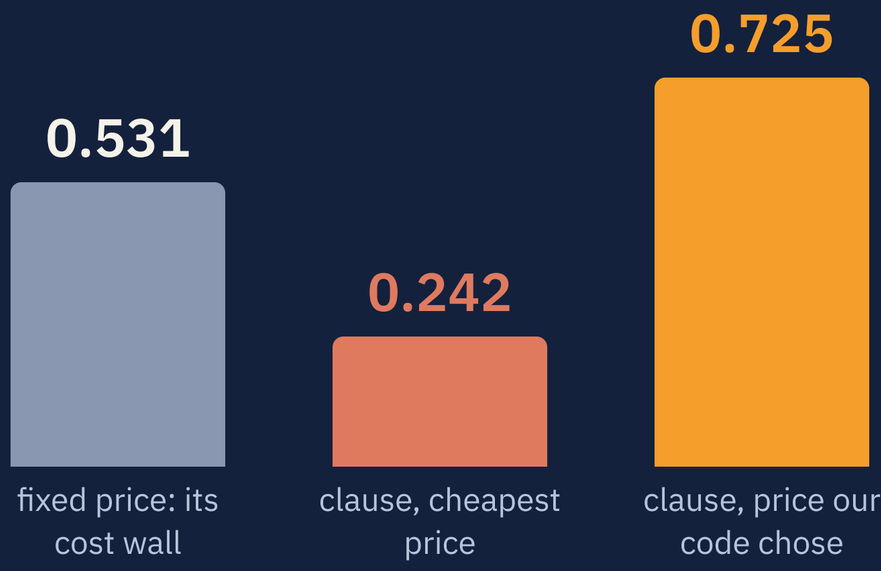

Case by case

Score = share of the possible saving captured · kit LLM agent Sat 15:27 vs jonathans_branch@8a854c4 Sun 04:29 · orange = the three biggest gains

HIGHLIGHT 1 · P02 COPPER MOTOR

Sell the supplier security, not a lower price

€367.56

the supplier's full cost, recovered to the euro from two of the arena's own charges

0.105 → 0.725

P02, kit agent → ours

HIGHLIGHT 2 · P08 STAINLESS BAR

The same data, the right two rows

BEFORE: FIRST AND LAST ORDER (P18)

"We ordered at 5.75 two years ago, 5.84 today."

Supplier: "it does not change our calculation"

AFTER: THE PAIR AROUND ITS PRICE JUMP (P08)

"5.17 in December, 5.45 in September."

Supplier: 5.52 → 5.17 in one reply

0.433 → 0.814

P08, kit agent → ours

3 cases

moved by the same rule: P03, P08, P18

80.3

out of 100 on the practice cases - from 61.5 for the kit agent

Structure first

payment, term, start date, clause - before price

Measure, don’t guess

own simulator, replay proofs, one session per idea

Code decides

the LLM reads; checked facts do the arguing
